PREFACE TO THE NEW EDITION.

THE present edition of a work which, now some twenty years before the public, may justly be said to have maintained a standard character, has been undertaken at the request of the author's family. The Editor takes pleasure in saying that, in the minute revision to which the book has been subjected, he has found little more to do than to carry out to a greater completeness the lines of Mr. Soule's original design. That design, not only in its general conception, but in the execution of its details, seems to him, on the whole, the best that any single work on Synonymes in our language affords, — an impression which has grown stronger during the process of comparison with the chief works of that class rendered necessary in preparing this edition, and which it is believed a like comparison on the part of readers will surely corroborate.

The judicious consulter of a synonymic dictionary will readily acquiesce in the statement that a perfect manual of that sort is impossible within the compass of a single work of convenient size and arrangement. Three distinct points of view are necessary to fulfil the wants that are sure to arise when such a work has to be consulted, — the writer, seeking for the most suitable expression, may set out from the less suitable *word*; or from the vague general *notion* that he obscurely aims to express; or, finally, from *several words of cognate meaning*, the exactly suitable one of which he would determine by a close discrimination between them. A work on Synonymes may thus have for its purpose either an alphabetic list of all the more important words in the language, with their various meanings, or shades of meaning set down under them, each followed by its appropriate synonymes; or a list of general notions, duly named and properly divided and subdivided, with the words and phrases that belong to the

expression of each collected under them as fully as possible ; or, again, the collocation of words allied in meaning with subjoined disquisitions on the shades of difference between them. The latter conception has been the prevailing one among English makers of synonymic dictionaries, and is represented by the well-known work of Crabb, as well as by any ; the second is that of Roget's Thesaurus ; while the first is that of Soule. It is safe to say that while each is indispensable to a perfect fulfilment of a writer's possible wants, the first is that which is most comprehensive, most convenient and rapid in use, and most likely to meet the requirements of the greatest number of persons.

In endeavoring to carry out Mr. Soule's plan to greater perfection, the chief aim, beyond the correction of press-errors and obvious lapses of the pen, has been to discriminate the various senses of leading words more exactly, completing the distinction where it already existed in part, and supplying it where it was lacking. Besides this, the labor has been mainly confined to enlarging the lists of synonymic words and phrases. The number of such expressions has been increased, on an average, by about a third. For this purpose free use has been made of the new editions of Roget's Thesaurus and the Imperial Dictionary.

The Editor takes pleasure in making special acknowledgment of the assistance rendered him by Miss C. N. BYNNER. The primary revision of nearly one half of the text has been done by her ; and the thoroughness and accurate knowledge of our vocabulary, with which she has performed her task, have rendered the labor of final revision in that portion of the book comparatively light.

In a work involving so many details, it is impossible but that errors will have been left or committed, in spite of all endeavors to the contrary. Notice of any such, detected by readers, will be received with thanks.

PREFACE TO THE FIRST EDITION.

THE main design of this Dictionary is to provide a ready means of assistance when one is at a loss for a word or an expression that best suits a particular turn of thought or mood of the mind, or that may obviate an ungraceful repetition. Even practised and skilful writers are sometimes embarrassed in the endeavor to make a sentence more clear, simple, terse, or rhythmical, by the substitution of one form of diction for another. It is presumed that they, as well as novices in composition, will find the present work useful in overcoming difficulties of this sort.

As to the method of using it: Whenever a doubt arises in regard to the fitness of any word, and a better one is not readily suggested, let the writer turn to this word in its alphabetical place. Under it will be found the words and phrases, or some clew to the words and phrases, which, in any connection, have the same meaning as itself, or a meaning very nearly the same. That one of them which comes nearest to expressing the exact shade of thought in the writer's mind will be likely to arrest the attention and determine the choice.

In most cases, all the words that belong to any group will be found in that group. But in some instances, as when the same word falls into two or more groups that are near to each other, or when there are so many synonymes for a word that a repetition of every one of them under each in its alphabetical place would seem to be too formal and prolix, the inquirer is referred to some prominent word among them for a view of the whole. Under the word *Blockhead*, for example, reference is made to the word *Dunce*, under which will be found all the words that are synonymous with it. This example is given because it is the most marked one in our language of a multiplicity of terms for the same idea.

Many nouns ending in *ness*, and adverbs ending in *ly*, have been omitted in their alphabetical places, for the reason that their synonymes are sufficiently indicated by the corresponding adjectives.

The aim has been to present at a single glance the words or modes of speech which denote the same object, or which express the same general idea, with only slight shades of difference. There has been no attempt at elaborate discussion of the nice distinctions that obtain between words apparently synonymous ; but hints of such distinctions have been given whenever it was practicable to give them briefly in a parenthetical remark.

In preparing this Dictionary, free use has been made of the following works : Roget's Thesaurus of Words and Phrases ; the Quarto Dictionaries of Webster and of Worcester ; Crabb's Synonymes ; Graham's Synonymes ; Whately's Synonymes ; Platt's Synonymes ; the Dictionaries of Synonymes by Fenby, Sherer, Mackenzie, and Smith ; the Medical Dictionaries of Dunglison and of Thomas ; and the United States Dispensatory by Wood and Bache. It contains much, however, that has been gathered from a wide field of miscellaneous reading during a long series of years.

The author is under special obligations to his friends, Mr. JUSTIN WINSOR, Mr. WILLIAM A. WHEELER, and Mr. LOOMIS J. CAMPBELL, for the interest they have manifested in the progress of the work, and for their valuable suggestions and criticisms
